

# Utah State University Bear Lake Observatory Weekly Riometer Analysis

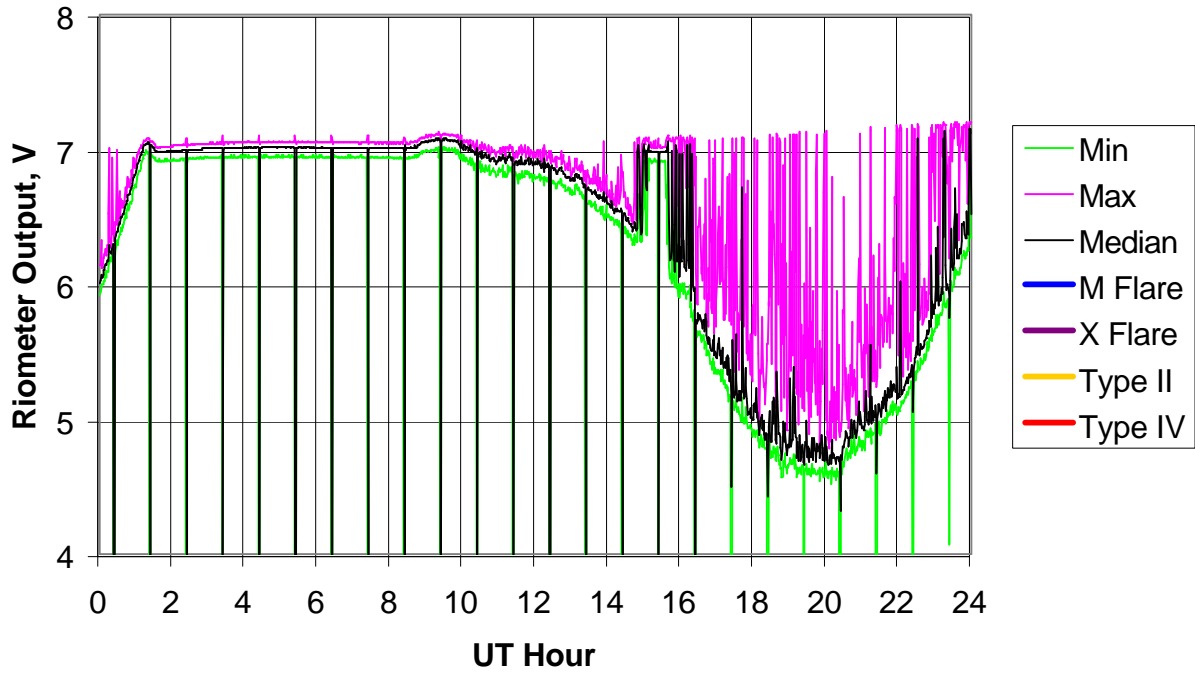

Prepared by:  
Don Rice

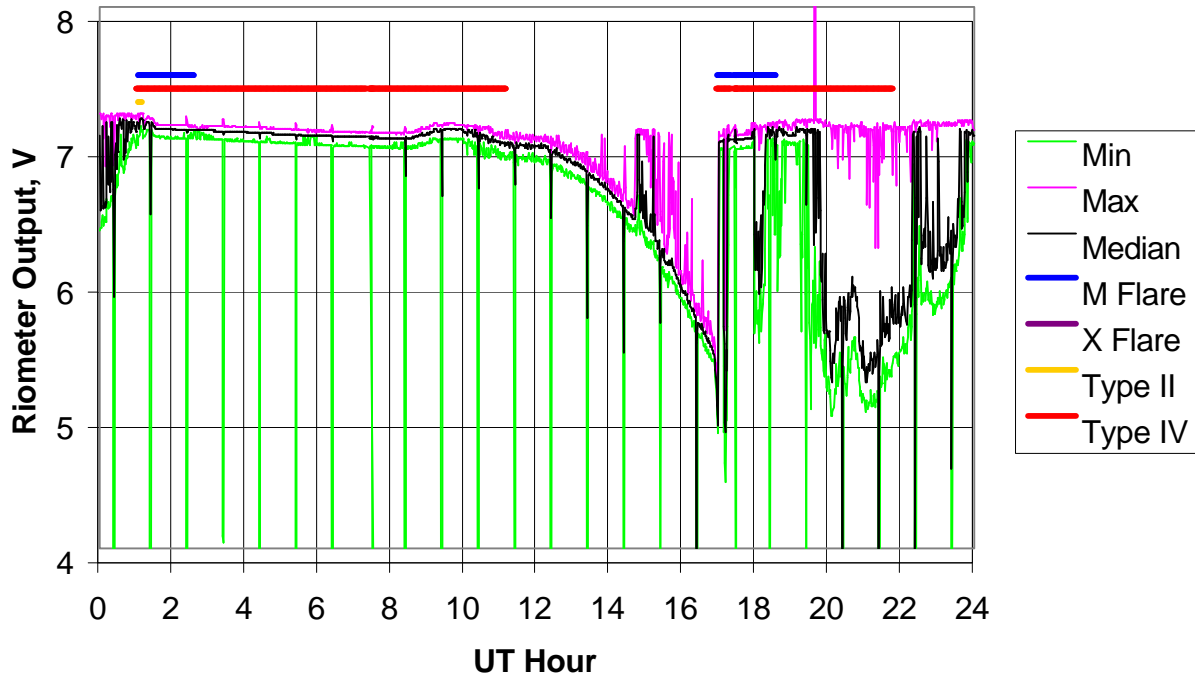

## Remarks:

Moderate solar x-ray flares occurred on August 22-23 with slight absorption.  
Flare absorption was obscured by strong Type II and IV solar radio noise on these days.  
A dawn flare on August 28 produced absorption after 1000 UT.  
Thunderstorms produced strong noise on August 22 from 1700 UT onward.

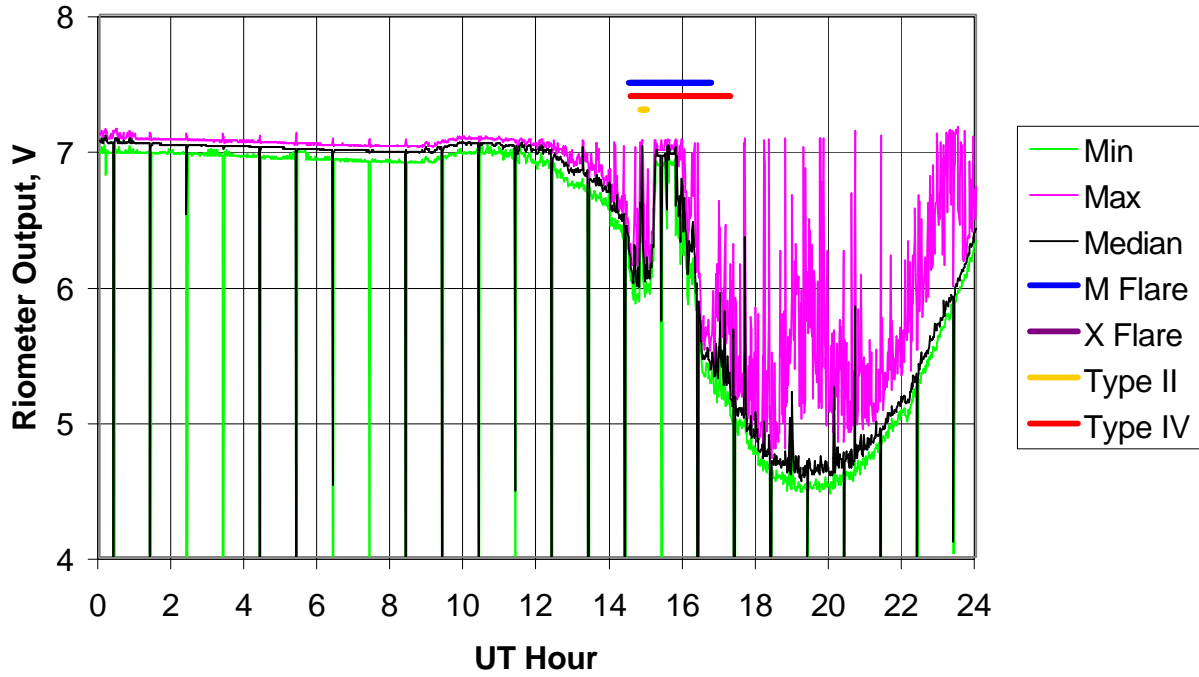

### BLO Riometer, 2005 Day 233 (21 Aug 2005)
