

Utah State University Bear Lake Observatory Weekly Riometer Analysis

Prepared by:
Robert Call

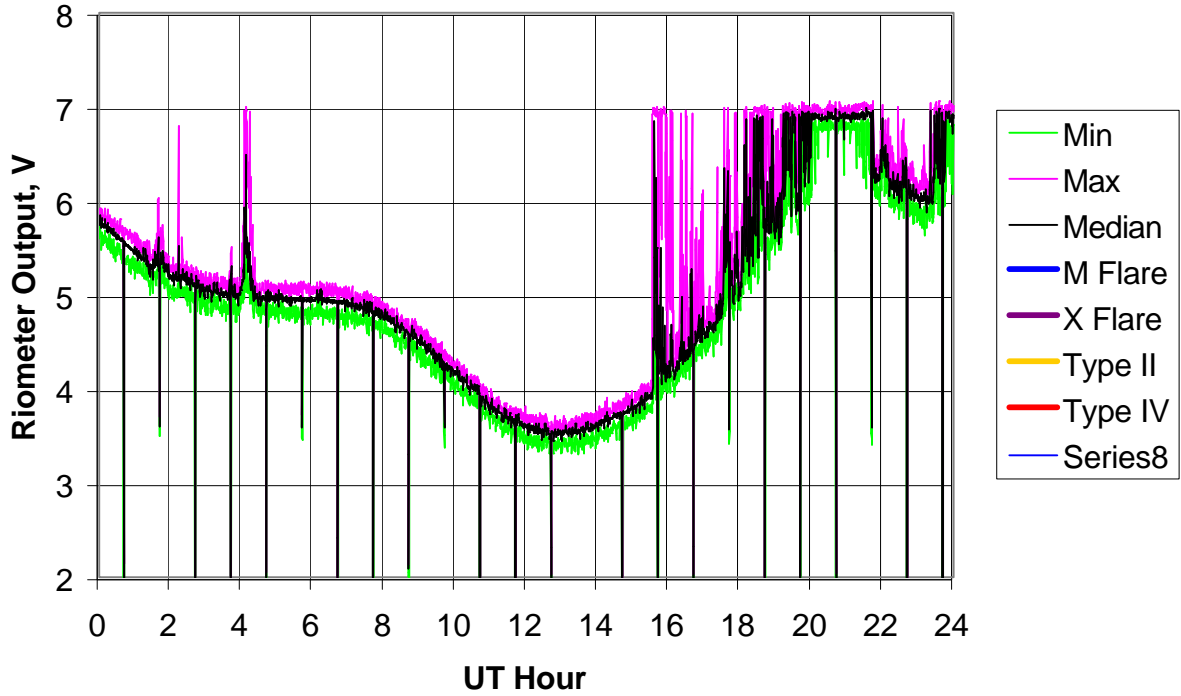

Reviewed by:
Jennifer Albretsen

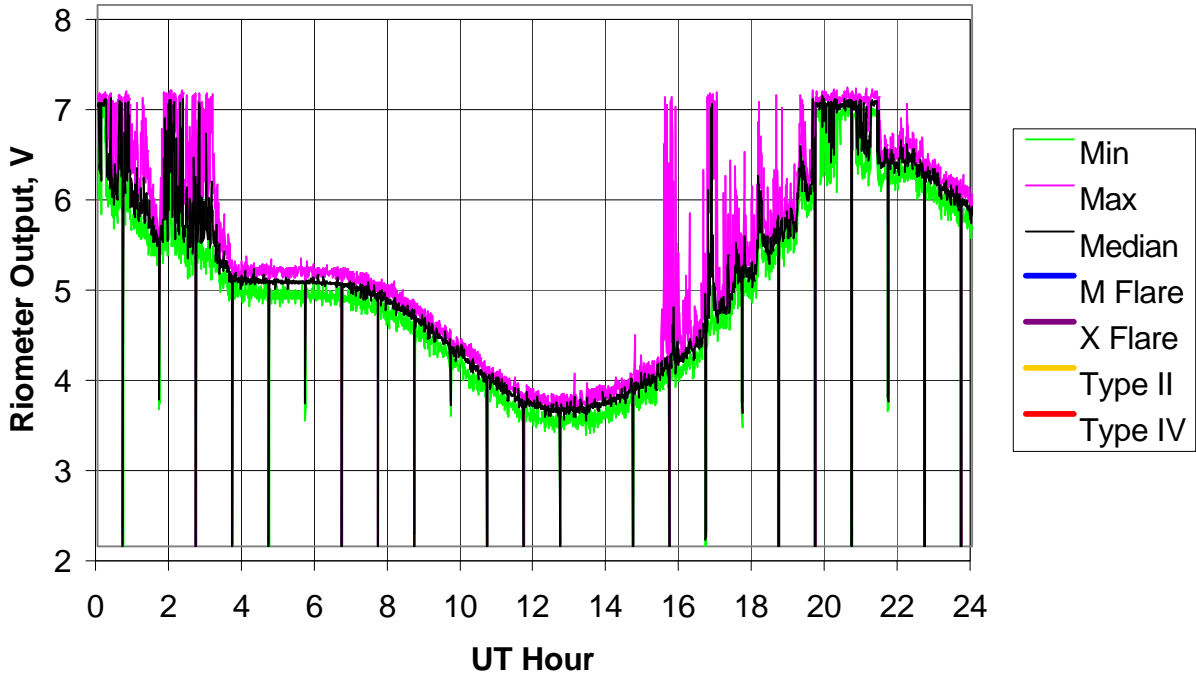

Remarks:

On 05 and 06 there is some interesting propagation starting at about 2000 UT.
Similar propagation occurs on the 11 for an even longer period of time.
06 is the only day with propagation at the beginning of the UT day (sporadic E).
On 09 we see an almost picture perfect quiet day curve.

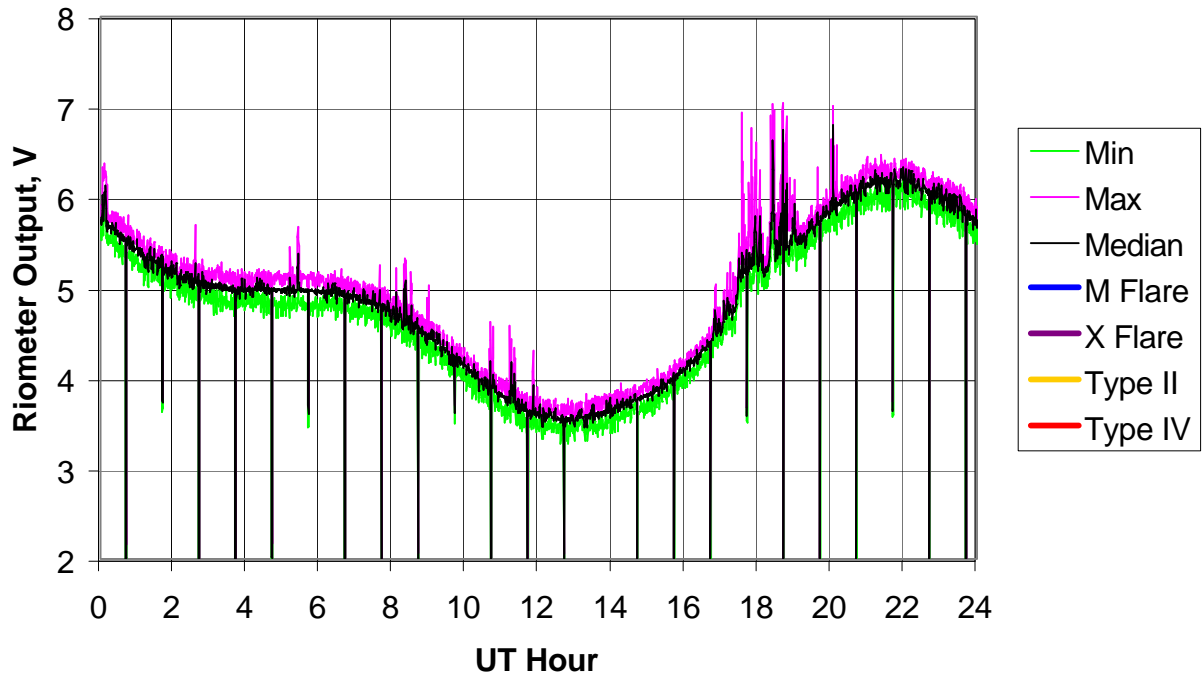

BLO Riometer, 2005 Day 339 (05 Dec 2005)

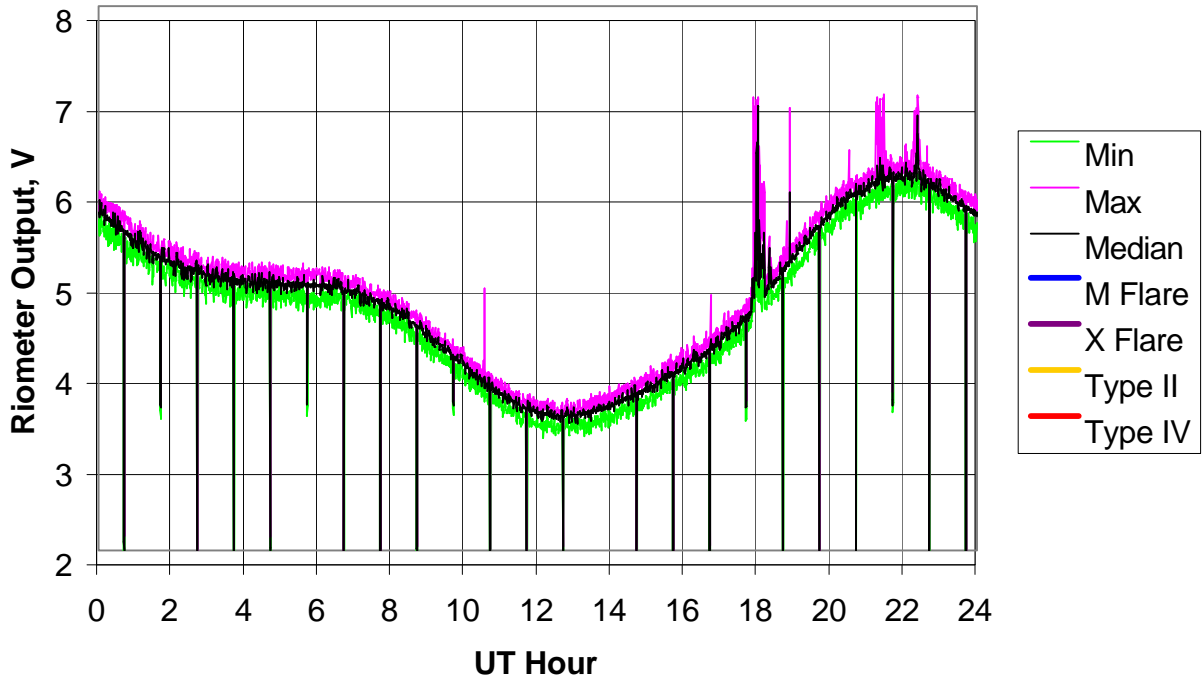

BLO Riometer, 2005 Day 340 (06 Dec 2005)

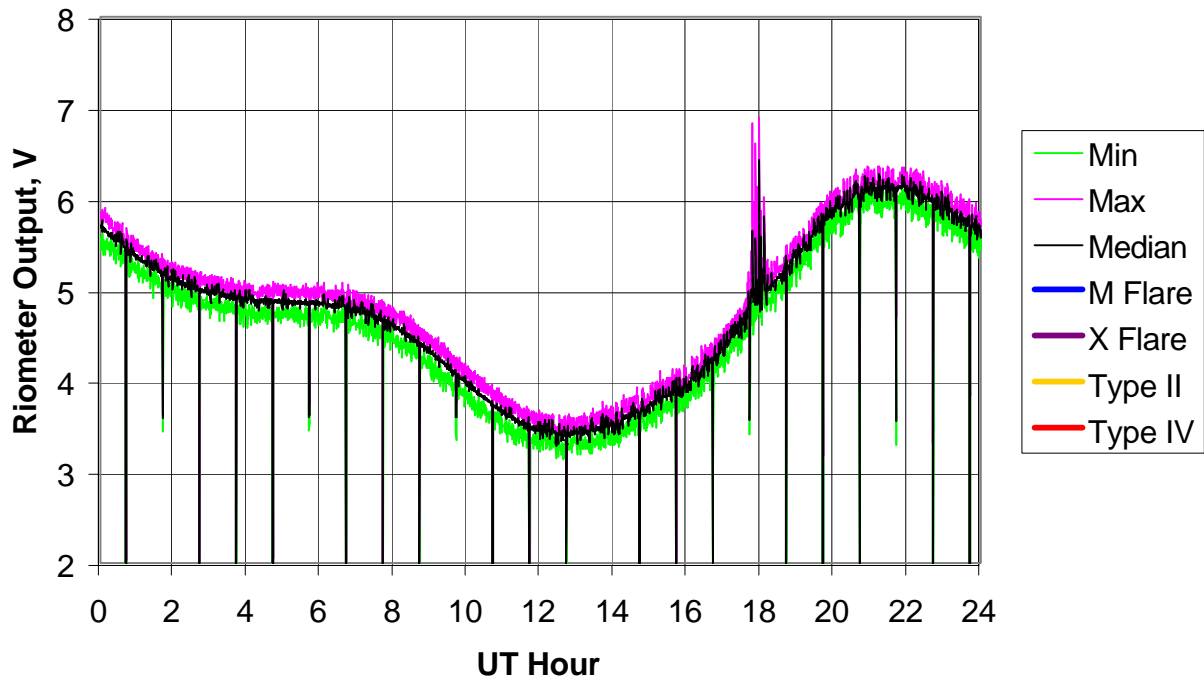

BLO Riometer, 2005 Day 341 (07 Dec 2005)
