

Utah State University Bear Lake Observatory Weekly Riometer Analysis

Prepared by:
Robert Call

Reviewed by:
Jennifer Albretsen

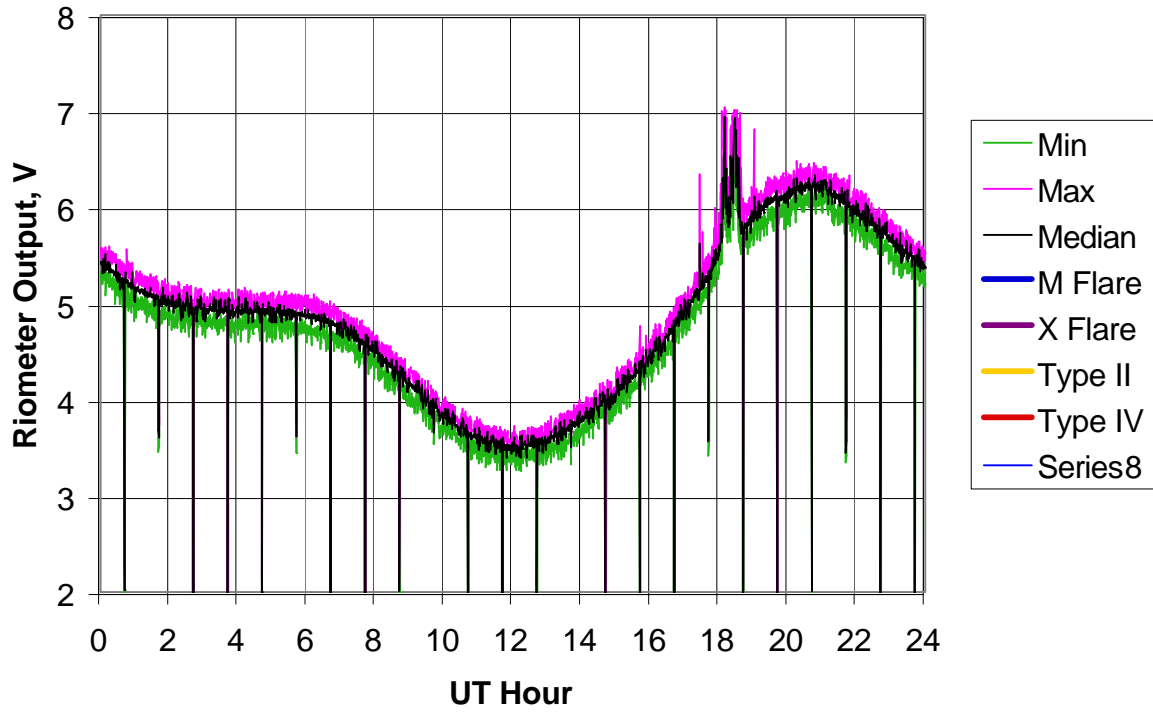

Remarks:

Always seems to be some noise right after 1800 UT.

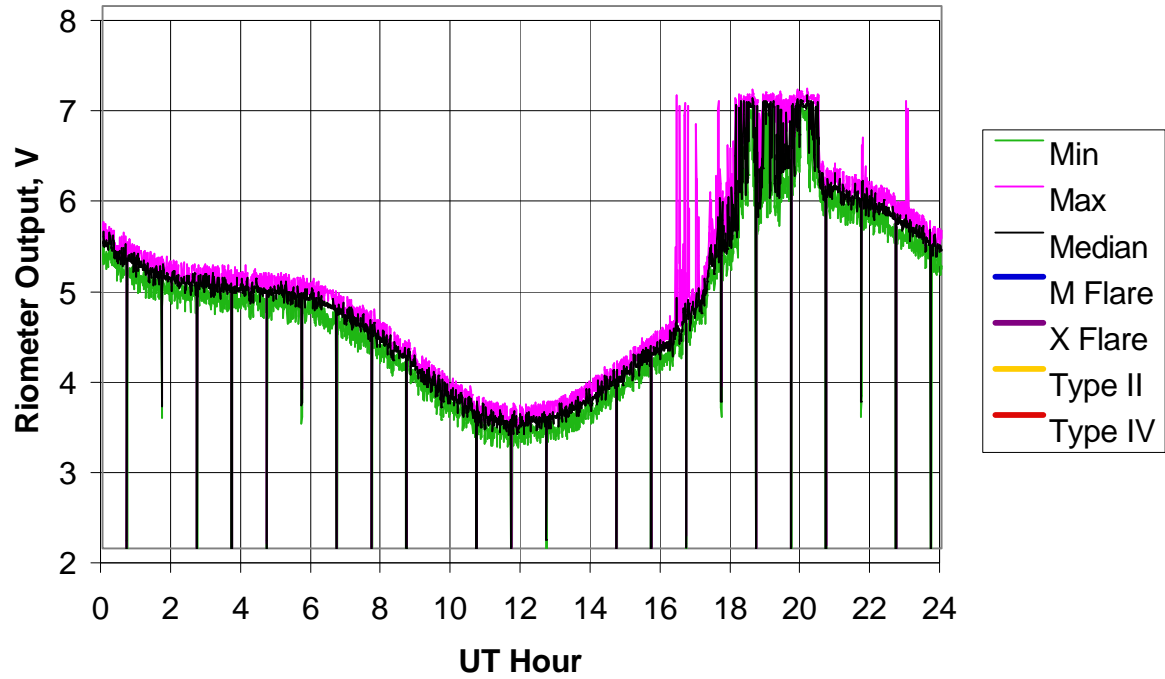

Noise on the 25th from 0400 to 0500 may have been caused by a solar flare, but maybe not (that would be a pretty drastic reaction).

The 22nd has quite a bit of noise early in the earlier UT hours, not sure what caused it.
